

# SUPPORT FOR WINDOWS SERVER 2003 IS ENDING

TIME TO MIGRATE AND UPDATE YOUR SYSTEMS WITH OUTSOURCERY

## THE SITUATION

the day support for Windows Server 2003 will end

**UNDER 62%** - APPZERO  
of businesses don't have a plan to migrate or aren't aware that support is ending

The number of days Microsoft estimates it will take a SME to migrate

Microsoft had to carry out 32 critical security updates in 2014

Between 70% and 80% of the top 10 malware detected by a company could be avoided if their technology was up-to-date

On average, 1 critical security update was required every 11 days in 2013 and 2014

It costs nearly double to repair a system that's more than four years old - Windows Server 2003 is now 12 years old

70% of CIOs will embrace a 'cloud first' strategy by 2016

- IDC

**45%**

of total IT spending will be cloud-related by 2020

- FORRESTER
